10.5

Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and 60 pairs per carton for shipping. Store in a cool dry place. If stored correctly, the gloves physical properties will not change for up to two years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended, especially if potential hazards exist. Before removal from the hands, excess contaminant should first be removed from the gloves. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

How to decontaminate your leather glove.

Under no circumstances should leather submerged in water.

- 1 Prepare a lukewarm water solution using mild detergent.
- 2 Gently wipe your leather glove with a cloth.
- 3 In-order to reduce stiffening, allow the leather glove to dry naturally.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.
