

INDUSTRIAL RUBBER GLOVES H1 & H2

H1

H2

Description

Dromex® H1 and H2 heavy duty black and orange unlined natural rubber latex gloves are thicker than regular latex gloves making them considerably more durable with high elasticity whilst providing increased protection against punctures and abrasion.

These gloves are available in different lengths with an option of either a smooth and crinkled palm finish. Crinkled finish palm and fingers are especially good for grip in wet and oily applications such as handling and assembling of small oily parts and general assembly.

The rolled cuffs prevent glove rolldown/rollback and provides drip protection for the forearm.

Suitable for use in industrial environments such as mines, hardwares, construction, plumbing and material handling as well as mechanical industries.

These thick natural latex gloves are designed to protect hands and arms for special jobs such as chemical disposal and contact, handling laboratory experiment, unidentified liquid and powder recycle and examination, corpse transportation, agricultural pesticide, plywood manufacturing, work in plague zone, fishing, etc.

Special Instructions

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The manufacturer has examined under the system for ensuring quality of production by means of monitoring and inspection. The gloves are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. The information contained herein is intended to assist the wearer in the selection of personal protective equipment.

Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the gloves suitability for the intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations EN420 for innocuousness and EN388:2016 for Mechanical Risks (3,1,1,0,X).

Specifications

Style:	Heavy duty, black rubber latex glove, with a rolled open cuff and a choice of smooth or crinkled palm and length belows:		
	• H1-40	Smooth Palm, Rolled Cuff, Elbow 40cm length	
	• H2-40	Rough Palm, Rolled Cuff, Elbow 40cm length	
	• H2-55	Rough Palm, Rolled Cuff, Shoulder 55cm length	
Liner:	N/A		
Palm:	Crinkled palm, 0.7mm $\pm 5\%$ Smooth palm, 0.7mm $\pm 5\%$		
Wrist:	Smooth finish 0.6 mm $\pm 5\%$		
Mass:	H1-40	220g (± 5) per pair (size L)	
	H2-40	224g (± 5) per pair (size L)	
	H2-55	288g (± 5) per pair (size L)	

Sizes Available

L (All styles)

Packaging, Storage & Obsolescence

Individually wrapped and sold as 120 pairs per carton for shipping. Store in a cool dry place and out of direct sunlight and UV light. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed.

Should this not be possible, it is advisable to ease left and right-hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

These gloves may then be de-contaminated with mild detergent solution, then rinsed with clean water and dried ideally with some air movement.

In order to maximise the glove life cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.
